

Screen-1:

An option is provided for respective AEs to verify the data with EPCCB and approve the smart meter installations done by M/s AESL team.

Following are displayed for verification.

- Old Meter Serial No as per EPCCB and replaced by AESL
- Old Meter Make as per EPCCB and replaced by AESL
- Old Meter Final Reading (KWH) as per EPCCB and send by AESL
- Old Meter Final Reading (KVAH) as per EPCCB and send by AESL
- New Meter Serial Number installed to Service Number

Smart Meters Install For Approval

Once these services are approved then these will appear in Meter Changes screen. If any mismatch is observed and rejected, then these will push to M/s AESL for reverification.

Screen-2:

After installation of smart meters, bills will be generated automatically as per the billing data sent by M/s AESL and bills to be sent to the consumers in the electronic mode. Hence mapping of mobile numbers is very important.

In view to the above a screen is developed to verify the given mobile number belongs to the consumer or not and the bill can be sent in WhatsApp to that number or not. If it is invalid, then this data is rejecting to M/s AESL for reverification and getting the valid mobile number.

Smart Meters Mobile Number Validation
